New BMW paint brochure

All

Presentation of BMW paint brochure:

The existing BMW paint brochure has been thoroughly revised and in its new form provides good reference for assessing all kinds of paint and corrosion damage.

The examples and detailed descriptions contained in the brochure are intended to find a standard language for identifying paint and corrosion damage. Unambiguous descriptions of damage mean that misinterpretations can be largely ruled out when assessing a possible warranty claim. Communication between the customer and the authorised BMW dealer during assessment on the vehicle is also made greatly easier.

If for example the following damage is unambiguously identified on the paint surface, this will always be considered to be the responsibility of the customer, and warranty will be ruled out:

- Mechanical influences on the paint surface (e.g. scratches)
- Damage to the paint surface caused by chemical or biological influences (e.g. animal droppings)

The new BMW paint brochure complements the BMW paint handbook when eliminating paint and corrosion damage. This means that the repair procedures described in the BMW paint handbook are adapted unambiguously and purposefully to the fault pattern.

Subsequent orders for BMW paint brochure:

The BMW paint brochure can be ordered via the usual parts-related channel under the BMW parts number 01 29 2 148 332.
