

SX4

Way of Life!

READY, SET, DRIVE

The car is in the driveway, time is on your side and you're all set for drive off. So take your friends and family, get inside the Suzuki SX4 and let the road lead the way, because life in the SX4 is all about FUN.

Whether it's a short drive to the local café or a few-day road trip to the bush, nothing beats sitting behind the wheel of the SX4, with nothing to worry about but the directions to get you there.

This dynamic fun-machine's all-round performance makes it the sensible choice if you're looking to combine daily commuting with the freedom to hit the road in search of adventure and excitement.

Zoom in on the lighter side of life

Taking the SX4 for a spin will show you just how much more there is to life than just driving. Its comfortable and responsive nature lets you enjoy the scenery as you glide seamlessly along the road in full control.

CVT with shift paddles

The Continuously Variable Transmission (CVT) delivers smooth and efficient transitions for quieter, more comfortable performance. Completing the experience, racing-style shift paddles are built directly into the steering wheel, allowing you to change gears without a moment's hesitation.

Six-speed manual transmission

The six-speed manual transmission is specifically designed to take advantage of the engine's torque potential. The sixth gear takes the place of an overdrive, for smooth and efficient highway driving.

Illuminated meter cluster

The meter cluster is illuminated in stylish blue and red, including a central display showing the time, outside temperature and fuel consumption. This style is echoed across the front dash panel, creating a fully integrated driving space.

Air conditioner

The climate control dials are conveniently located for both the driver and the front passenger, making it easy to adjust interior conditions exactly to your liking.

Audio system

The MP3-ready CD tuner lets you enjoy your favourite music on the nine-speaker audio system. The four speakers and four tweeters are built directly into the doors to create a high quality personal listening studio. A dashboard centre speaker finishes off the surround sound effect.

Absolute pleasure without the pressure

With enough space to seat five in complete comfort, every journey is something to look forward to. The flexible seats are designed to ensure that passenger comfort is not compromised when changing gears and the convenient compartments in the car are an absolute pleasure to have.

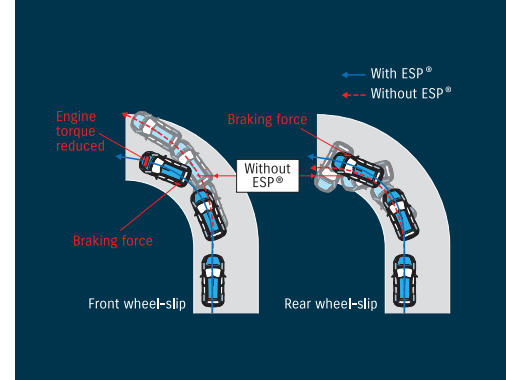

ESP® control system

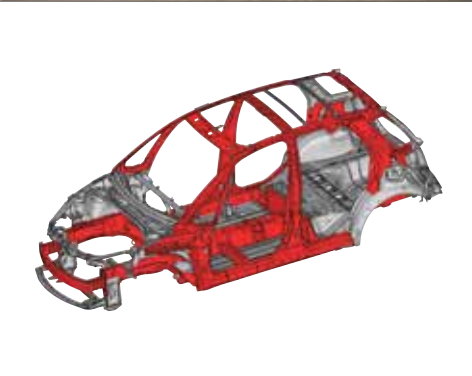

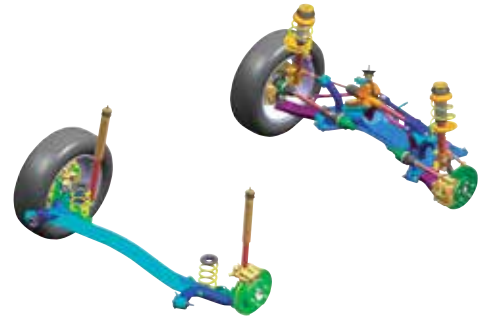

Available on AWD models, ESP® (Electronic Stability Program) supplements the Suzuki SX4's inherent stability with three major functions: ABS (Anti-lock Brake System) with EBD (Electronic Brake Force Distribution), traction control and stability control. ESP®'s ECU uses various sensors to determine and hold the intended cornering line, greatly increasing traction and stability control while reducing front and rear wheel-slip for enhanced safety.

*ESP® is a registered trademark of Daimler AG.

Steadfast, responsive system

SX4 uses an independent MacPherson strut front suspension and rigid torsion beam rear suspension. This design helps to absorb vertical motion to reduce bouncing and provide a safer, smoother ride, while also providing enhanced linear handling response for greater ride comfort.

Seatbelts

The front seats are equipped with three-point ELR seatbelts with pre-tensioners and force limiters for enhanced safety in the event of an accident. The rear seats feature three-point ELR seatbelts and are equipped with two child seat anchorages.

Safety-engineered body

The SX4 body combines a rigid frame that directs collision energy around the cabin and away from occupants, and numerous crumple zones that help absorb and dissipate collision energy before it can reach the interior. This design is further enhanced by side impact door beams, reconfigured side members and other reinforcements throughout.

Preventative measures

The SX4 is designed to provide the driver with ample visibility on all sides by elevating the driver's seat position and minimising blind spots. A six-airbag system combining SRS front, side and curtain airbags is also available to help prevent injury in the event of a collision.

One road leads to another

Not only do you want a car that's fun to drive, but you also need one that will change the way you see the road ahead of you. The SX4 is tough, dependable, striking and suits any lifestyle. No matter where you want to go or wherever you end up, the SX4 will take you there.

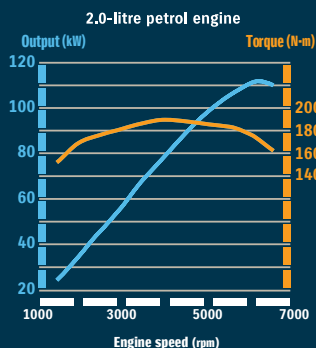

Confidently in control

Even through tough driving conditions, the SX4 confidently powers through. The strong, rigid body offers uncompromising driving adrenaline partnered with total peace of mind – leaving you to concentrate on having fun behind the wheel.

Engine performance curves

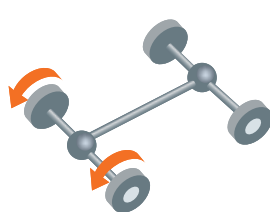

2.0-litre 16-valve DOHC VVT 112kW of Power @ 6,200 r/min

The SX4's powerplant delivers high-energy excitement from the moment you start the ignition. At low rev ranges the Variable Valve Timing (VVT) puts out ample torque for immediate responsiveness and quick acceleration that never feels sluggish. As the rev rate increases, the timing is instantly and automatically adjusted to enable more effective fuel combustion, putting an impressive 112kW of power at your command for highway cruising that feels sure and relaxed.

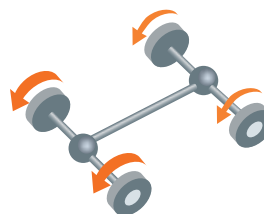

SX4 AWD

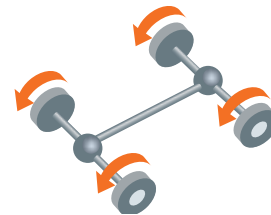

2WD

The 2WD mode transmits power primarily to the front wheels, providing a drive that's quiet, efficient and perfect for dry, hard surfaces.

4WD AUTO

For the rougher roads or rainy conditions that can occur during everyday driving, the 4WD Auto mode provides superior traction, with rear torque automatically increasing when front wheel-slip is detected.

4WD LOCK

In slippery mud or loose gravel, the 4WD Lock mode provides constant torque to both axles, for easier manoeuvrability in low-traction conditions. At speeds over 60km/h the system automatically switches to, and remains in, 4WD Auto Mode.

Luggage room

The 60:40-split rear seats fold down to allow larger items to be stowed in the back while still providing space for two occupants. Folding down both of the rear seats creates a convenient room with up to 992 litres (VDA) of carrying space.

Elevated seating

SX4 features an elevated seat position for both front and rear occupants. This provides the driver with a high-visibility vantage point for added safety and manoeuvrability, while all occupants can enjoy the enhanced comfort and ease of entry and exit.

Suzuki Smartpass™ keyless locking

The keyless start system comes with a remote control unit. When the unit is brought within 80cm of the driver's door handle, it communicates with an in-vehicle key free system, which activates the lock mechanism. The user can then unlock the door keylessly using a button on the door.

Keyless engine startup

When the user enters the new SX4 with the remote control unit and sits on the driver's seat, the in-vehicle key-free system communicates with the engine control unit, enabling the user to start the engine by simply turning an engine-start knob. The user does not need to take the remote control out of his/her pocket.

SUZUKI

COMPLETE

Suzuki understands that purchasing a new vehicle is a substantial investment. Our unwavering commitment to customer satisfaction is represented in our 'Suzuki Complete' programme, which includes every aspect of the post-sales support, comprising the warranty, service plan and roadside assistance as standard.

Warranty

All Suzuki models are covered by a comprehensive manufacturer's warranty against any defects for a period of 3 years or 100 000km.

Service Plan

The SX4 benefits from a 6yr / 90 000km service plan. This plan includes the replacement of oil, the oil filter, fuel filter, brake fluid, air filter and accessory belts, but excludes tyres, brakes and other wear-and-tear items.

Roadside Assistance

In addition, every new car sold incorporates a roadside assistance plan, administered and operated by the Automobile Association of SA. Amongst its many features, this comprehensive package incorporates around-the-clock AA road patrols, battery and locksmith call-out-services, mechanical and electrical breakdown towing (accident towing is optional), emergency medical rescue and vehicle repatriation.
