

EQUIPMENT

The joy of cruising has been heightened with delightful features installed at every turn.

LEXUS Navigation System

The LEXUS navigation system, with the latest functions and high-speed hardware built in, can pinpoint your destination by accessing a large bank of map data, calculate the recommended route and provide on-screen guidance in one simple and quick process.

211MO23

- The 6.5-inch wide LCD (Liquid Crystal Display) screen responds quickly and is easy to use.
- The navigation ECU that reads the map data on the DVD (Digital Versatile Disc) is located in the luggage room. The GPS (Global Positioning System) antenna is located under the package tray.
- DVD has been selected as the medium for storing the map data enabling a large volume of data to be utilized.
- With the adoption of a touch panel, multiple functions can be handled with a simple configuration of switches. The audio system is also operated through the touch panel.

211MO75

- The easy-to-see guidance display includes a three-position tilt display function to suit the tastes of the occupants. The tilt angle is controlled by a switch on the panel surrounding the screen.

Tilted
