

EXTERIOR

From that captivates with dynamic flowing surfaces.

Front Design

The front view brims with sophistication and originality.

- The deeply carved molding of the line from the hood to the fender creates a sharp, firm mask.
- An imposingly-shaped light that follows the flow of the fender top has been adopted. Its flowing, elongated image is appealing.
- Within the simple molding, the elaborately decorated grille imparts a sense of refined sophistication.

Rear Design

A powerful, sporty rear view.

- The rear combination light has been brought around the side, to enhance the sense of breadth.
- Molding that smoothly connects the body with the luggage door communicates a sense of integration as well as sophistication.
- A sculpted surface construction expresses a sense of presence and the appearance of stability.

Side Design

A flowing, expressive side silhouette.

- The best feature of the side view is intended to be the door side (front fender to rear fender) surface structure which dynamically and emotionally in a way that has never been seen before.
- The roof line gently flows into the rear, contributing to a beautiful side view.
- Sharp character lines create dynamic proportions, while at the same time fusing with the rear quarter pillar to yield a lovely three-dimensional curved line.
- To ensure quietness, a sash-type door has been adopted. A sense of sportiness is expressed through a shape like that of a hard-top.
