OLDSMOBILE PARTS PUBLICATIONS

The Oldsmobile Parts Catalog System is divided into the following publications:

NO.	TITLE
30	Oldsmobile Parts Catalog — Models through 1975
30A	Oldsmobile Parts Illustration Catalog — Models through 1975
31	Oldsmobile Parts Catalog — 1976-1980 Models
31A	Oldsmobile Parts Illustration Catalog — 1976-1980 Models
36	Oldsmobile Dealer Parts and Accessories Price Schedule
87	GM Parts Division History Catalog
89	GM Standard Parts and Maintenance Products Catalog

CONTENTS

	GROUP
INTRODUCTION	—

INTRODUCTION

This Parts Catalog has been compiled for the purpose of locating, identifying, and ordering replacement parts. All data and specifications contained in this publication are based on the latest product information available at the time of printing. General Motors Parts Division reserves the right to make changes at any time without notice in data, price, specifications, material, and model. The "List Prices" shown are suggested prices only for sales to consumers.

Replacement parts are listed in this catalog under 16 major groups, as shown on the content page. Individual parts are assigned a Prime Group number, the first numeral of the group identifies the main unit it is affiliated with, and following the decimal is the Sub-Group number under which all parts of the same name and function are listed. For example, Group 0.519 Camshaft. The "0" denotes that it is an Engine Part, "519" the sub-group where all Engine Camshafts are listed. Related parts may also be found in the same group. Within each group, parts are listed by model year, vehicle series, part number, number used per vehicle or R.H.-L.H. designation, suggested list price, part name and description.

Parts may be used in different locations on the car requiring the listing of the part number in more than one group. When this "Cross Referencing" occurs, the prime group is shown in brackets i.e. (1.850) in the description column.

To locate a listing for a part, determine the model vehicle and refer to the group number identifying it, which may be determined by using any of the following methods.

- A. When the name of the part is known, consult the ALPHABETICAL INDEX, which lists parts by noun name and Group Number where part is listed.
- B. Reference may be made to the ILLUSTRATION CATALOG, where Group Numbers, noun names or part numbers are shown.
- C. When a part number is known and model application or a similar part is required, consult the DEALER PRICE SCHEDULE for the Group Number to locate the part in the Parts Catalog.

Parts having application or used with optional equipment are identified by Option Number or abbreviation of option. Familiarity with Option Numbers will assist in determining correct part required.

Complete identification for models and options listed in this catalog will be found preceding the alphabetical index.

Service part numbers are assigned to individual parts that make up an assembly used in the production of models. Certain items may not be listed, such as short tubing parts or fuel lines that can be made up by dealers from bulk material or attaching parts may be included in packages with the major assembly and not listed separately.

Right Hand and Left Hand parts are so designated from the driver's position when seated in the car.

Model information has been condensed for quick reference whenever possible by showing the years the part is used, i.e. 1966-68 ALL indicates the part is used on all 1966 through 1968 models inclusive. Parts used only on certain models are identified by the exception of models (exc.) or vehicle series, model name or descriptive application for models. When series is shown such as 5400, this includes all 5400 series, or when shown as 5437-39-67, includes series 5437, 5439 and 5467. Commencing with the 1973 models the series designation is shown using the series letters or combination of letters and numerical code, i.e., 1973 - A, B, C, E, X or 1973 AG, BN, etc. The comma (,) used in the vehicle series column should be considered as the word (and).

OLDSMOBILE BODY IDENTIFICATION INFORMATION

BODY NUMBER PLATE

The body number plate identifies the body style, body assembly plant, body number, trim combination number and paint code. On all Oldsmobiles the plate is located on the left upper portion of the vertical surface of the dash firewall.

BODY STYLE NUMBER SERIES

The body style number series located on the body number plate may be used to indicate three possibilities:

Division - The first digit in the series identifies the division (example 3 5639 Oldsmobile)

Division and Car Line - The first two digits identifies the Division and the car line (example 35 639 Oldsmobile "Big Car" or 33 817 Oldsmobile "F85")

Division, Car Line and Style Group - The first three digits identifies the division, car line and style group (example 356 39 Oldsmobile Dynamic 88)

BODY STYLE NUMBER SUFFIX

The last two digits of the five number series indicate body type as follows: (example 356 39 Four Door Sedan Hardtop)

07 - 2 Door Sport Coupe with Pillar Post
17 - 2 Door Sport Coupe Hardtop
35 - 4 Door Station Wagon 2 Seat
36 - 4 Door Station Wagon 2 Seat
w/Dual Action Tail Gate
