

SECTION 1-4

OPERATION OF INSTRUMENTS AND CONTROLS

Lights, Wipers and Defogger

Headlights and turn signals	122
Emergency flashers	125
Instrument panel light control	125
Front fog lights	126
Personal lights	126
Interior light	128
Ignition switch light	129
Luggage compartment light	130
Windshield wipers and washer	131
Rear window wiper and washer	131
Rear window and outside rear view mirror defoggers	132

Headlights and turn signals (with automatic light control system)

HEADLIGHTS

To turn on the following lights: Twist the headlight/turn signal lever knob.

Position 1—Parking, tail, license plate, side marker and instrument panel lights

Position 2—Headlights and all of the above

Position 3 (“AUTO”)—Headlights and/or all of the lights in position 1

They automatically turn on or off depending on the darkness of the surroundings.

Manually twist the knob to the position 2 to turn on the headlights if they are needed immediately when entering a dark tunnel, parking structure, etc.

The automatic light control sensor is on the top of the driver's side instrument panel.

Do not place anything on the instrument panel, and/or do not affix anything on the windshield to block this sensor.

If you feel that the automatic light control comes into operation too early or too late, have the sensor adjusted by your Toyota dealer.

The lights automatically turn off when either front doors or sliding doors are opened with the ignition key in the “ACC” or “LOCK” position. To turn them on again, turn the key to the “ON” position or actuate the headlight switch. If you are going to park for over one week, make sure the headlight switch is off.

NOTICE

To prevent the battery from being discharged, do not leave the lights on for a long period when the engine is not running.

Daytime running light system

The headlights turn on at reduced intensity when the parking brake is released with the engine started, even with the light switch in the “OFF” position. They will not go off until the ignition switch is turned off.

To turn on the other exterior lights and instrument panel lights, twist the knob to the position 1.

Twist the knob to the position 2 to turn the headlights to full intensity for driving at night.

01 SIENNA_U (L/O0008)

Headlights and turn signals (without automatic light control system)

High-Low beams—For high beams, turn the headlights on and push the lever away from you (position 1). Pull the lever toward you (position 2) for low beams.

The headlight high beam indicator light (blue light) on the instrument panel will tell you that the high beams are on.

Flashing the high beam headlights (position 3)—Pull the lever all the way back. The high beam headlights turn off when you release the lever.

You can flash the high beam headlights with the knob turned to “OFF”.

TURN SIGNALS

To signal a turn, push the headlight/turn signal lever up or down to position 1.

The key must be in the “ON” position.

The lever automatically returns after you make a turn, but you may have to return it by hand after you change lanes.

To signal a lane change, move the lever up or down to the pressure point (position 2) and hold it.

If the turn signal indicator lights (green lights) on the instrument panel flash faster than normal, a front or rear turn signal bulb is burned out.

HEADLIGHTS

To turn on the following lights: Twist the headlight/turn signal lever knob.

Position 1—Parking, tail, license plate, side marker and instrument panel lights

Position 2—Headlights and all of the above

The lights automatically turn off when either front doors or sliding doors are opened with the ignition turned off. To turn them on again, turn the key to the “ON” position or actuate the headlight switch. If you are going to park for over one week, make sure the headlight switch is off.

01 SIENNA_U (L/O0008)

NOTICE

To prevent the battery from being discharged, do not leave the lights on for a long period when the engine is not running.

Daytime running light system

The headlights turn on at reduced intensity when the parking brake is released with the engine started, even with the light switch in the "OFF" position. They will not go off until the ignition switch is turned off.

To turn on the other exterior lights and instrument panel lights, twist the knob to the position 1.

Twist the knob to the position 2 to turn the headlights to full intensity for driving at night.

High-Low beams—For high beams, turn the headlights on and push the lever away from you (position 1). Pull the lever toward you (position 2) for low beams.

The headlight high beam indicator light (blue light) on the instrument panel will tell you that the high beams are on.

Flashing the high beam headlights (position 3)—Pull the lever all the way back. The high beam headlights turn off when you release the lever.

You can flash the high beam headlights with the knob turned to "OFF".

TURN SIGNALS

To signal a turn, push the headlight/turn signal lever up or down to position 1.

The key must be in the "ON" position.

The lever automatically returns after you make a turn, but you may have to return it by hand after you change lanes.

To signal a lane change, move the lever up or down to the pressure point (position 2) and hold it.

If the turn signal indicator lights (green lights) on the instrument panel flash faster than normal, a front or rear turn signal bulb is burned out.

01 SIENNA_U (L/O0008)

Emergency flashers

To turn on the emergency flashers, push the switch.

All the turn signal lights will flash. To turn them off, push the switch once again.

Turn on the emergency flashers to warn other drivers if your vehicle must be stopped where it might be a traffic hazard.

Always pull as far off the road as possible.

The turn signal light switch will not work when the emergency flashers are operating.

NOTICE

To prevent the battery from being discharged, do not leave the switch on longer than necessary when the engine is not running.

Instrument panel light control

To adjust the brightness of the instrument panel lights, turn the dial.

01 SIENNA_U (L/O0008)

Front fog lights

To turn on the front fog lights, twist the band of the headlight and turn signal switch lever. They will come on only when the headlights are on low beam.

Personal lights

Front (with moon roof)

The front personal lights operate separately with each lens.

To turn on the light, push the lens on your side. To turn the light off, push the lens once again.

Front (without moon roof)

The front personal lights operate separately with each lens.

To turn on the light, push the lens on your side. To turn the light off, push the lens once again.

To turn on the front personal lights, push the switch.

The front personal light switch has the following positions:

“OFF”—Turns the light off.

“DOOR”—Turns the light on when either front or sliding door is opened.

01 SIENNA_U (L/O0008)

Center

The center personal lights operate separately with each lens.

To turn on the light, push the lens on your side. To turn the light off, push the lens once again.

To turn on the center personal lights, slide the switch.

The center personal light switch has the following positions:

“OFF”—Turns the light off.

“DOOR”—Turns the light on when either front or sliding door is opened.

ILLUMINATED ENTRY SYSTEM

Front (with moon roof)—

The light comes on when either front or sliding doors are opened. After all the doors are closed, the light remains on for about 15 seconds and then goes out.

Front (without moon roof) and center—

With the switch in the “DOOR” position, the light comes on when either front or sliding door is opened. After all the doors are closed, the light remains on for about 15 seconds and then goes out.

However, in the following cases, the light goes out immediately:

- All the doors are closed when the ignition key is in “ACC” or “ON” position.
- All the doors are locked when the light is still on.
- One door will be closed with the lock knob pushed forward (front door) or downward (sliding door) while the other doors are locked.

When the driver’s door is unlocked with a key, the light comes on for 15 seconds, even if the doors are not opened.

PERSONAL LIGHTS CUT OFF OPERATION

When the ignition switch is “OFF” and any personal lights in the vehicle stay lighting on, the lights will cut off automatically after 30 minutes.

You can cancel the cut off operation by:

- Turning the key to the “ACC” position.
- Opening or closing any of the doors.
- Turning off all the “ON” lights.

All the lights are turned off when all the doors are locked by the key or wireless remote control transmitter.

The key must be in the “OFF” position.

01 SIENNA_U (L/O0008)

Interior light

Front

To turn on the front interior light, push the switch.

The front interior light switch has the following positions:

“ON”—Keeps the light on all the time.

“OFF”—Turns the light off.

Vehicles without power door lock system—
“DOOR”—Turns the light on when either front door is opened.

Vehicles with power door lock system—
“DOOR”—Turns the light on when either front or sliding door is opened.

Center

To turn on the center interior light, slide the switch.

The center interior light switch has the following positions:

“ON”—Keeps the light on all the time.

“OFF”—Turns the light off.

“DOOR”—Turns the light on when either front or sliding door is opened.

Rear

To turn on the rear interior light, slide the switch.

The rear interior light switch has the following positions:

“ON”—Keeps the light on all the time.

“OFF”—Turns the light off.

“DOOR”—Turns the light on when either sliding or back door is opened.

01 SIENNA_U (L/O0008)

ILLUMINATED ENTRY SYSTEM (with power door lock system)

Front and center—

With the switch in the “DOOR” position, the light comes on when either front or sliding doors are opened. After all the doors are closed, the light remains on for about 15 seconds and then goes out.

However, in the following cases, the light goes out immediately:

- All the doors are closed when the ignition key is in “ACC” or “ON” position.
- All the doors are locked when the light is still on.
- One door will be closed with the lock knob pushed forward (front door) or downward (sliding door) while the other doors are locked.

When the driver's door is unlocked with a key, the light comes on for 15 seconds, even if the doors are not opened.

INTERIOR LIGHTS CUT OFF OPERATION

When the ignition switch is “OFF” and any interior lights in the vehicle stay lighting on, the lights will cut off automatically after 30 minutes.

You can cancel the cut off operation by:

- Turning the key to the “ACC” position.
- Opening or closing any of the doors.
- Turning off all the “ON” lights.

All the lights are turned off when all the doors are locked by the key or wireless remote control transmitter.

The key must be in the “OFF” position.

Ignition switch light

For easy access to the ignition switch, the ignition switch light comes on when any of the doors are opened.

The light remains on for 15 seconds when all the doors are closed.

Vehicles with power door lock system—
However, in the following cases, the light goes out immediately:

- All the doors are closed when the ignition key is in “ACC” or “ON” position.
- All the doors are locked when the light is still on.
- One door will be closed with the lock knob pushed forward (front door) or downward (sliding door) while the other doors are locked.

01 SIENNA_U (L/O0008)

When the driver's door is unlocked with a key, the light comes on for 15 seconds, even if the doors are not opened.

IGNITION SWITCH LIGHT CUT OFF OPERATION

When the ignition switch is "OFF" and ignition switch light in the vehicle stays lighting on, the light will cut off automatically after 30 minutes.

You can cancel the cut off operation by:

- Turning the key to the "ACC" position.
- Opening or closing any of the doors.
- Turning off all the "ON" lights.

The light is turned off when all the doors are locked by the key or wireless remote control transmitter.

The key must be in the "OFF" position.

Luggage compartment light

To turn the luggage compartment light on, open the back door and push the switch downwards. To turn it off, push the switch upwards or close the back door.

LUGGAGE COMPARTMENT LIGHT CUT OFF OPERATION

When the ignition switch is "OFF" and luggage compartment light in the vehicle stays lighting on, the light will cut off automatically after 30 minutes.

You can cancel the cut off operation by:

- Turning the key to the "ACC" position.
- Opening or closing any of the doors.
- Turning off all the "ON" lights.

The light is turned off when all the doors are locked by the key or wireless remote control transmitter.

The key must be in the "OFF" position.

Windshield wipers and washer

To turn on the windshield wipers, move the lever to the desired setting.

The key must be in the “ON” position.

Lever position	Speed setting
Position 1	Intermittent
Position 2	Slow
Position 3	Fast

With interval adjuster: The “INT TIME” band lets you adjust the wiping time interval when the wiper lever is in the intermittent position (position 1). Twist the band upward to increase the time between sweeps, and downward to decrease it.

To squirt washer fluid, pull the lever toward you.

If the windshield wipers are off, they will operate a couple of times after the washer squirts.

For instructions on adding washer fluid, see “Adding washer fluid” in Section 7–3.

In freezing weather, warm the windshield with the defroster before using the washer. This will help prevent the washer fluid from freezing on your windshield, which can block your vision.

NOTICE

Do not operate the wipers if the windshield is dry. It may scratch the glass.

Rear window wiper and washer

To turn on the rear window wiper, twist the lever knob upward.

The key must be in the “ON” position.

Lever position	Speed setting
Position 1	Intermittent
Position 2	Normal

To squirt washer fluid on the rear window, twist the knob upward or downward as far as it will go (position 3 or 4). The knob automatically returns from these positions after you release it.

For instructions on adding washer fluid, see “Adding washer fluid” in Section 7–3.

01 SIENNA_U (L/O0008)

NOTICE

Do not operate the rear wiper if the rear window is dry. It may scratch the glass.

Rear window and outside rear view mirror defoggers

With manual air conditioning controls

With automatic air conditioning controls

To defog or defrost the rear window, push the switch.

The key must be in the "ON" position.

The thin heater wires on the inside of the rear window will quickly clear the window surfaces. An indicator light will illuminate to indicate the defogger is operating.

On some models, heater panels in the outside rear view mirrors will also quickly clear the surfaces.

Push the switch once again to turn the defoggers off.

The system will automatically shut off after the defoggers have operated about 15 minutes.

CAUTION

On some models, since the mirror surfaces can get hot, keep your hands off them when the defogger switch is on.

Make sure you turn the defoggers off when the surfaces are clear. Leaving the defoggers on for a long time could cause the battery to discharge, especially during stop-and-go driving. The defoggers are not designed for drying rain water or for melting snow.

01 SIENNA_U (L/O0008)

If the outside rear view mirrors are heavily coated with ice, use a spray de-icer before operating the switch.

NOTICE

When cleaning the inside of the rear window, be careful not to scratch or damage the heater wires or connectors.

01 SIENNA_U (L/O0008)
