2005 tC

This *Pocket Reference Guide* is a summary guide for basic vehicle operations. It contains brief descriptions of fundamental operations so you can locate and use the vehicle's main equipment quickly and easily.

The *Pocket Reference Guide* is not intended as a substitute for the *Owner's Manual* located in your vehicle's glove box. We strongly encourage you to review the *Owner's Manual* and supplementary manuals so you will have a better understanding of your vehicle's capabilities and limitations.

Your dealership and the entire staff of Scion, a marque of Toyota Motor Sales, U.S.A., Inc., wish you many years of satisfied driving in your new tC.

! A word about safe vehicle operations

This *Pocket Reference Guide* is not a full guide to tC operations. Every tC owner should review the *Owner's Manual* that accompanies this vehicle.

Pay special attention to the boxed information highlighted in yellow throughout the *Owner's Manual*. Each box contains safe operating instructions to help you avoid injury or equipment malfunction.

All information in this *Pocket Reference Guide* is current at the time of printing. Scion reserves the right to make changes at any time without notice.

Tire pressure

The tire pressure monitoring system provides a warning when the tire pressure in the tires is critically low while the vehicle is moving.

Refer to your Owner's Manual for more information.

Spare tire

Tool location

- 1 Wheel nut wrench
- 2 Towing eyelet
- 3 Jack handle
- 4 Spare tire
- 5 Jack

Removing the spare tire

- 1 Remove the spare tire
- 2 Loosen the bolt

Refer to your Owner's Manual for more information and procedures.

- Open door warning light¹
- Airbag SRS warning light¹
- Low tire pressure warning light¹
- MAINT

REQD

Engine oil replacement reminder light¹
- Turn signal indicator light
- Headlight high beam indicator light
- CRUISE

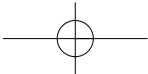

Cruise control indicator light²

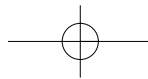

CAUTION

When the anti-lock brake system (ABS) function is in action, you may feel the brake pedal pulsating and hear a noise. In this situation, to let the anti-lock brake system work for you, just hold the brake pedal down more firmly. Do not pump the brake as this will result in reduced braking performance.

¹ For details, refer to "Service reminder indicators and warning buzzers," Section 1-6, 2005 Owner's Manual.

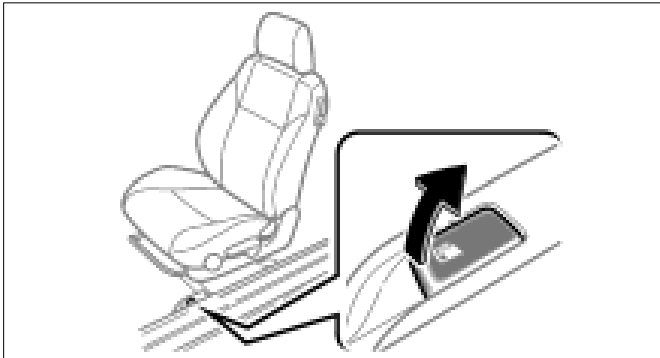

² If this light flashes, refer to "Cruise control," Section 1-7, 2005 Owner's Manual.

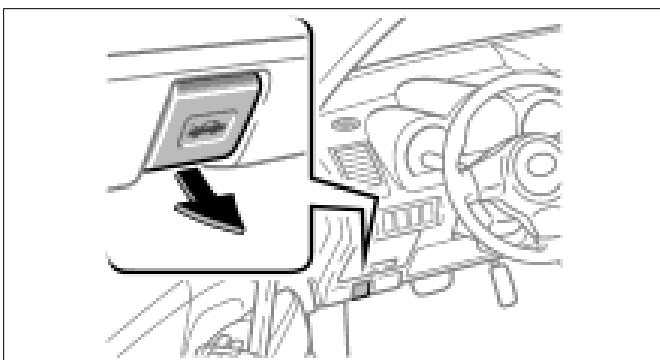

OVERVIEW

Fuel tank door opener

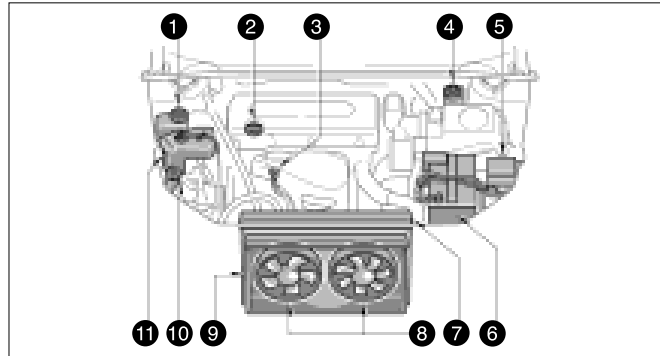

To open the fuel tank door Pull up on the opener.

Hood release lever

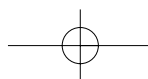

To open the hood Pull the lever inside vehicle.

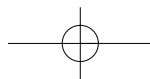

Engine compartment

- ❶ Power steering fluid reservoir
- ❷ Engine oil filler cap
- ❸ Engine oil level dipstick
- ❹ Brake fluid reservoir
- ❺ Fuse block
- ❻ Battery
- ❼ Radiator
- ❽ Electric cooling fans
- ❾ Condenser
- ❿ Windshield washer fluid tank
- ⓫ Engine coolant reservoir

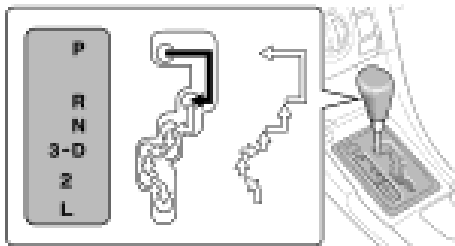

Note: Regularly scheduled maintenance, including oil changes, will help extend the life of your vehicle and maintain performance. Please refer to the "Owner's Warranty Information Booklet," "Scheduled Maintenance Guide" or "Owner's Manual Supplement."

FEATURES/OPERATIONS

Automatic transmission

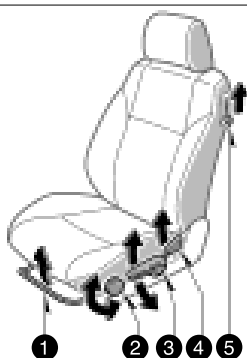

- P** Park Engine starting and key removal
- R** Reverse
- N** Neutral
- D** Drive Overdrive on*
- 3** Third gear Overdrive off
- 2** Second gear Increased engine braking
- L** First gear Maximum engine braking

↓ With the brake pedal depressed (the ignition switch must be in the "ON" position).

↕ Shift normally.

*Downshifting increases power going uphill, or provides engine braking going downhill. For best fuel economy during normal driving conditions, always drive with the shift lever in the "D" position.

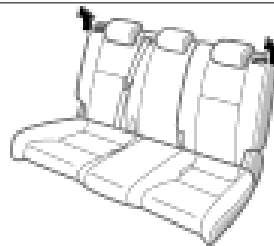

Seat adjustments-Front

- 1** Seat position adjusting lever
- 2** Seat cushion angle adjusting knob (for driver's seat)
- 3** Seat height adjusting lever (for driver's seat)
- 4** Seatback angle adjusting lever
- 5** Seatback lock release lever

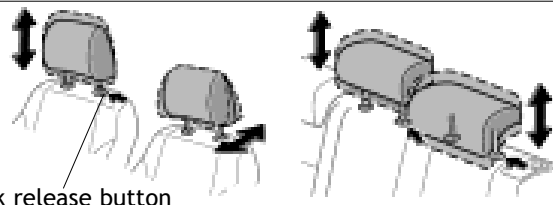

8

Seat adjustments-Rear

To adjust seatback angle Lean forward and pull the lever toward you. Then lean back to the desired angle and release the lever.

Seats-Head restraints

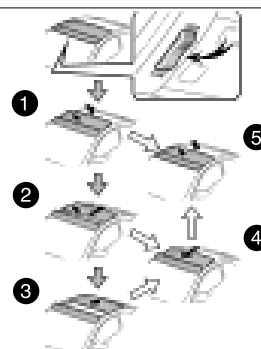

To raise Pull up the head restraint.

To lower Push down the head restraint while pressing the lock release button.

Driver's head restraint Push forward or pull backward.

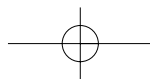

Panorama moonroof

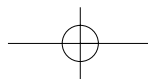

- 1** To tilt up Push "OPEN."
- 2** To open halfway Push "OPEN" again.
- 3** To open fully Push "OPEN" one more time.
- 4** To close Push "CLOSE."
- 5** To lower Push "CLOSE."

Refer to your *Owner's Manual* for more details.

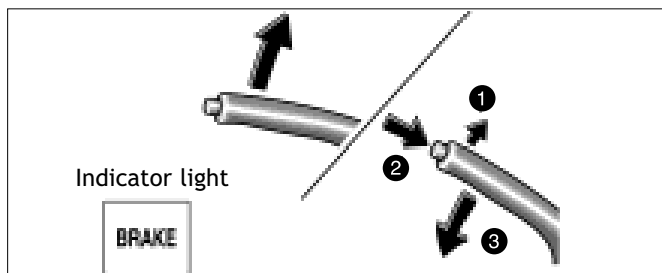

9

FEATURES/OPERATIONS

Parking brake

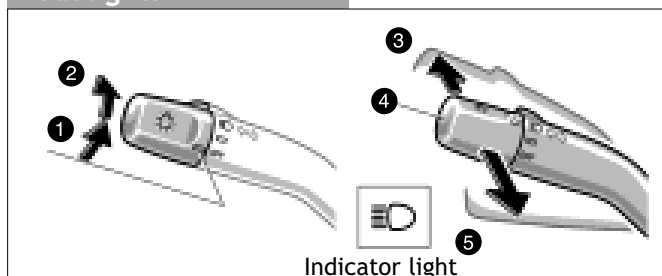

To set Pull the lever.

To release Pull the lever up slightly, press the lock release button, and lower.

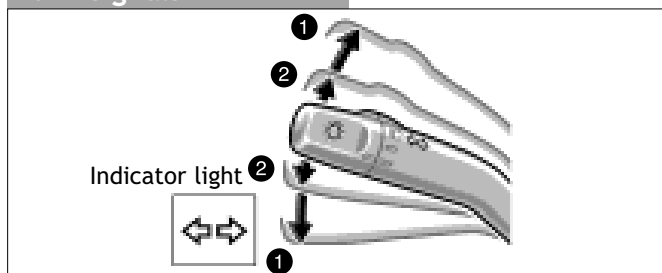

Lights & turn signals

Headlights

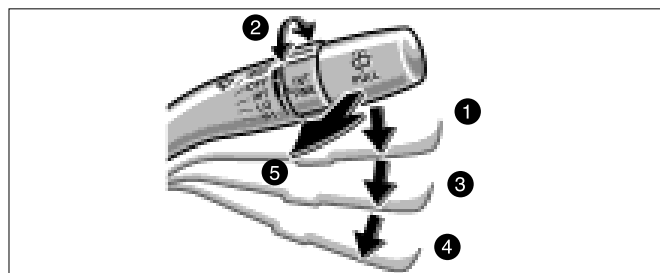

- ① **Parking, tail, license plate, side marker and instrument panel lights** Twist the lever knob to position 1.
- ② **Headlights and all of the above** Twist the lever knob to position 2.
- ③ **High beams** Push the lever.
- ④ **Low beams**
- ⑤ **Headlight flasher** Pull the lever.

Turn signals

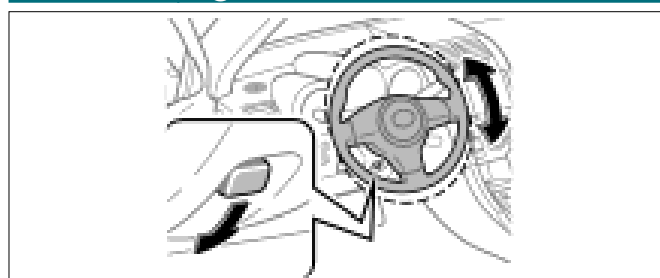

- ① **Right or left turn** Push the lever up or down.
- ② **Lane change** Move the lever up or down to position 2 and hold.

Windshield wiper & washer

- ① **Intermittent speed** Push the lever down to position 1.
- ② **Interval adjuster** Twist the band to adjust the intermittent speed.
- ③ **Slow speed** Push the lever down to position 3.
- ④ **Fast speed** Push the lever down to position 4.
- ⑤ **Washer fluid** Pull the lever toward you.

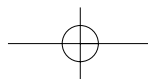

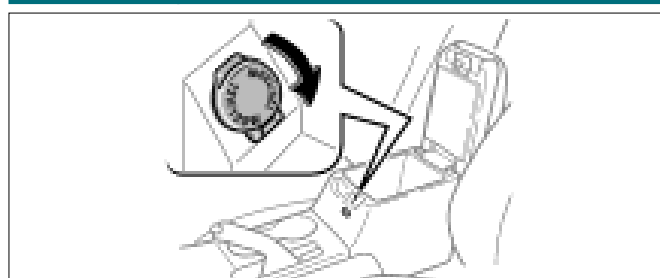

Tilt steering wheel

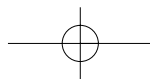

To change the steering wheel angle Hold the steering wheel, push the lock release lever down, tilt to the desired angle, and return the lever to its original position.

Note: Do not attempt to adjust while the vehicle is in motion.

Power outlet

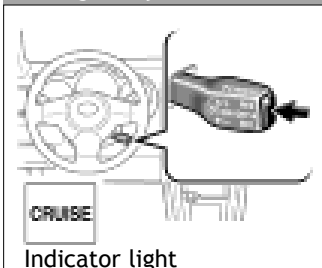

FEATURES/OPERATIONS

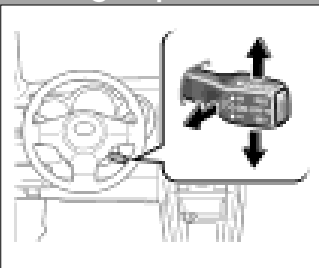

Cruise control

Turning the system on and off

Indicator light

Setting a speed

To turn the system on Press "ON-OFF" button.

To set a speed Bring your vehicle to the desired speed. Push the lever down toward "- SET."

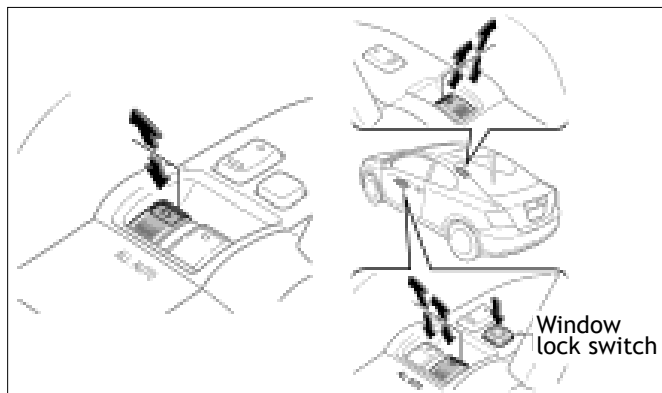

To resume a preset speed Push the lever up toward "+ RES."

To cancel the preset speed

- Pull the lever to "CANCEL."
- Depress the brake pedal.
- Depress the clutch pedal (manual transmission).
- Push "ON-OFF" button.

Refer to your *Owner's Manual* for more details.

Windows

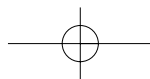

Window operation

To open or close Push down or pull up on the switch.

To fully open or close Push the switch completely down or pull it completely up and release.

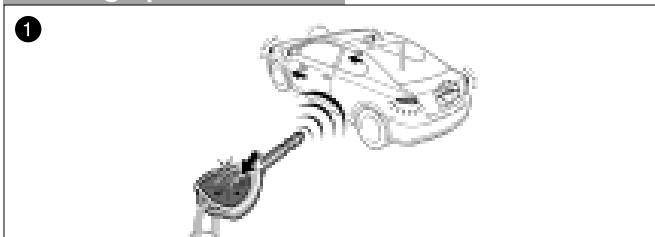

Window lock switch

Push the switch to deactivate passenger window.

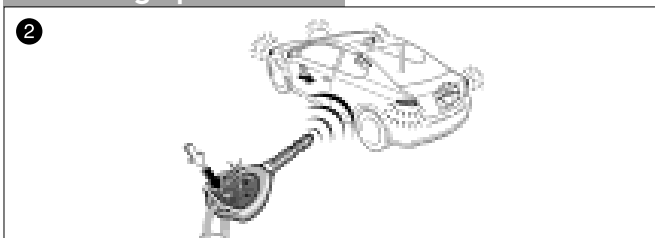

Remote keyless entry

Locking operation

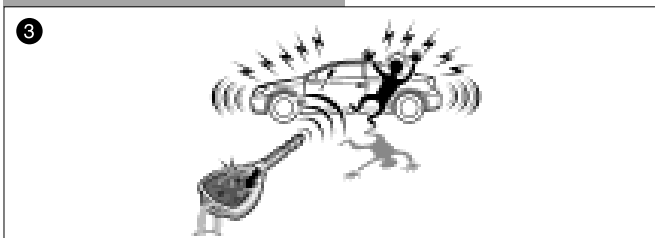

Unlocking operation

- ① To lock Push "🔒."
- ② To unlock driver door Push "🔓" once.
To unlock all the doors Push "🔓" twice.

Panic switch

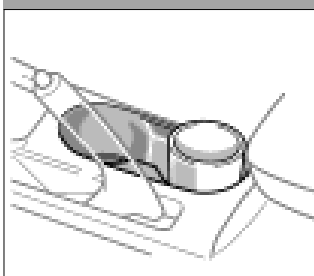

- ③ Panic switch operation Push "🚨."

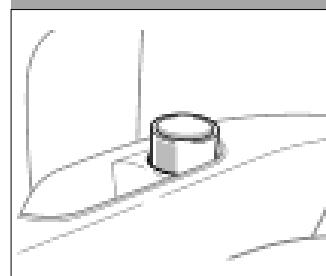

Refer to your *Owner's Manual* for more details.

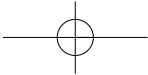

Cup holders

Front

Rear

FEATURES/OPERATIONS

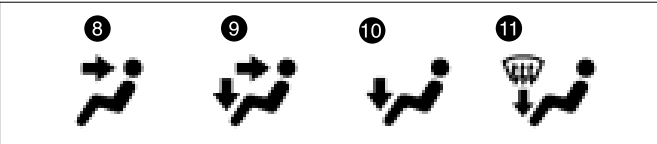

Air conditioning/Heating system

- 1 Fan speed selector
- 2 "OFF" button Air conditioning off button.
- 3 "A/C" button Air conditioning system on/off button.
- 4 Air intake selector
- 5 "MODE" button Air flow selector.
- 6 Windshield air flow button
- 7 Temperature selector

To select air flow vents

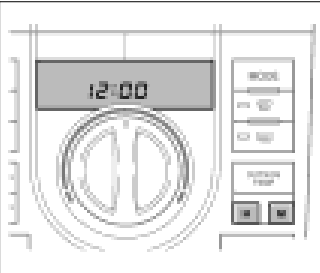

Turn the air flow selector to select one of the following:

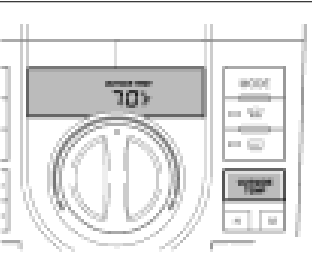

- 8 Instrument panel vents
- 9 Floor and panel vents
- 10 Floor vents
- 11 Floor and windshield vents

Refer to your *Owner's Manual* for more details.

Clock

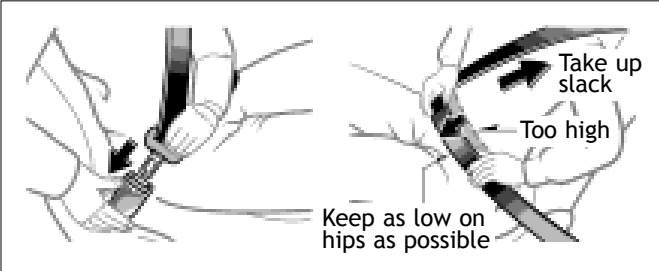

Outside temperature display

Refer to your *Owner's Manual* for more details.

SAFETY AND EMERGENCY FEATURES

Seat belts

Refer to your *Owner's Manual* for more details.

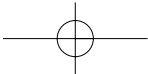

To install a child restraint system Refer to your *Owner's Manual* for more details.

Airbag-Supplemental Restraint System

The Airbag Supplemental Restraint System (SRS) front, side* and side curtain* airbags are designed to help provide further protection for the driver and outboard passenger in addition to the primary safety protection provided by the seat belts.

Please read the following caution boxes, and refer to your *Owner's Manual* for more details.

*If installed

CAUTION

- The driver and front passenger airbag Supplemental Restraint System (SRS) is designed only as a supplement to the primary protection of the seat belt systems of the driver and front passenger. The front seat occupants are particularly susceptible to injury if they do not wear their seat belts; when sudden braking or a collision occurs, they may be thrown forward. To obtain maximum protection in an accident, the driver and all passengers in the vehicle should always wear their seat belts when driving because serious injuries or death can result to unrestrained occupants. For instructions and precautions concerning the seat belt system, see "Seat belts" in the Owner's Manual.
- Scion strongly urges the use of a proper child restraint system on the rear seat that conforms to the size of the child. According to accident statistics, a child is safer when properly restrained in the rear seat than in the front seat.
- Never use a rear-facing child restraint system in the front seat. The force of the rapid inflation of the passenger airbag can cause severe injury or death to a child.
- Unless it is unavoidable, do not install a forward-facing child restraint system on the front seat. If you must install a forward-facing child restraint system on the front seat, move the seat as far back as possible.
- Make sure you have complied with all installation instructions provided by the child restraint manufacturer and the system is properly secured.

CAUTION

- The SRS side and side curtain airbags (optional) are designed to deploy in certain types of severe side impact collisions. In all other collisions, the side and side curtain airbags will not deploy. For instructions and precautions, see your Owner's Manual.
- Do not lean against the side doors when the vehicle is in use. The side and side curtain airbags inflate with considerable speed and force. Death or serious injury could result.
- Do not modify, cover or replace the surface of the front seats. Such changes could disable the system or prevent the airbags from activating correctly, resulting in death or serious injury.

Tire pressure warning system

The tire pressure monitor is designed to provide warning when tire pressure of any one of the tires is critically reduced while the vehicle is moving.

Refer to your *Owner's Manual* for more details.

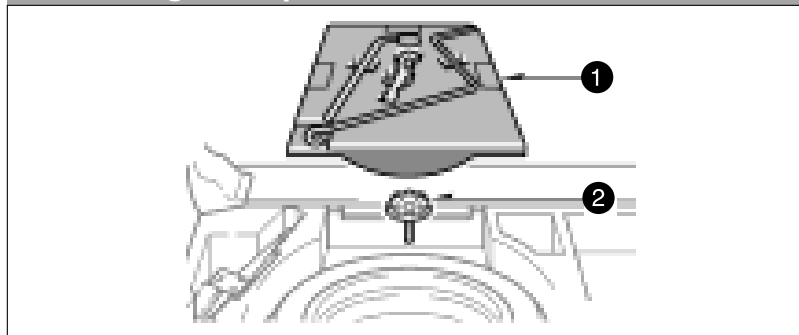

Spare tire & tools

Tool location

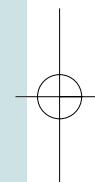

- ❶ Wheel nut wrench
- ❷ Towing eyelet
- ❸ Jack handle
- ❹ Spare tire
- ❺ Jack

Removing the spare tire

- ❶ Remove the spare tire cover.
- ❷ Loosen the bolt, then remove it.

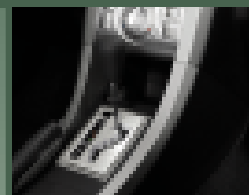

Refer to your *Owner's Manual* for tire changing procedures.
