The Cluster (without power memory seat), the Driver Seat Switch (with power memory seat), and the Memory Module

(if equipped) are fused by the 25 amp circuit breaker in Cavity 11.

The Passenger Seat Switch is fused by the 25 amp circuit breaker in Cavity 12. The Door Modules (except base), the

Driver Door Lock Switch (base), the Driver Express Power Window Switch (if equipped), and the Passenger Door

Lock Switch (base) are fused by the 25 amp circuit breaker in Cavity 13.
