

FREELANDER 2

HANDBOOK SUPPLEMENT

The following information replaces that contained in the Owner's Handbooks,
Part Numbers LRL 10 02 56 111 and LRL 10 02 56 121
This information relates to the towing weight limits.

Publication Part No. LSE 10 02 56 121

ESSENTIAL TOWING CHECKS

- If the vehicle is loaded to the maximum Gross Vehicle Weight (GVW) the tow ball nose weight is limited to 150 kg (330 lb).
- If a greater tow ball nose weight is required, the weight can be increased by up to an extra 100 kg (220 lb) but the vehicle load must be reduced by the same amount. This ensures that the GVW and maximum rear axle load are not exceeded and also allows for a maximum tow ball nose weight of 250 kg (550 lb).

RECOMMENDED TOWING WEIGHTS

Maximum permissible towing weights	On-road	Off-road
Unbraked trailers	750 kg (1650 lb)	750 kg (1650 lb)
Trailers with overrun brakes	2000 kg (4400 lb)*	750 kg (1650 lb)
Tow ball nose weight	150 kg (330 lb)	-

* Diesel vehicles only. In Algeria, Egypt, India, Libya, Morocco, Pakistan and Tunisia, the maximum permissible towing weight when towing a trailer with overrun brakes is 1500 kg (3307 lb).

Note: When towing, provided that vehicle road speed is limited to a maximum of 100 km/h (60 mph), the maximum GVW can be increased by up to 100 kg (220 lb).
